Summary Statement

I am currently working as a freelancer building web applications with React. I am result-driven, self-learning oriented, and raising the bar in development through the collaboration of management teams to build more significant ideas.

Experience

Freelance Web Developer

Contract, November 2020 – Present.

- Built personalized designer's portfolio and artist's websites.
- Co-produced with Designers and other Developers to create quality UX websites.
- Underlined workflow for other developers to meet client's requirements

Web Developer (front-end)

Alcadía Municipio Sucre, July 2018 – January 2019.

- Developed Static and Dynamic websites using HTML, CSS, and JavaScript.
- Collaborated with Producers, Designers, and other Developers to execute projects in an Agile work environment.

Network Analyst (Internship)

Alcadía Municipio Sucre, February 2018 – June 2018.

- Optimized IT Network operations from the IT department.
- Identified system & project deficiencies and recommend solutions to the team.
- Configured a new server using MikroTik, and Cisco for a better network performance

Teaching Assistant.

UNEFA, July 2017 – December 2018.

- Programming lessons for first-year students from the engineering career (second term).
- Debugging students' code when they encounter errors.
- Working with students to develop their own individualized learning path.

Education
